@DirtyF Nan mais c'est juste une stratégie marketing qu'on a mis en place avec l'aide de @davidbgk ! C'est pas vrai en fait. :x

@duboisnicolas connaissant @davidbgk ça m'étonnerait pas qu'il remette en question ses habitudes et c'est normal.

It's so much easier to talk about something sucks than to talk about how it could be awesome. Negativity is for the lazy.

# GENERIC CRAP-BASED VIEWS

Class members are the parameters passed to `__call__`.

On the date based views, the idea is to pass the queryset to the `super()` class filtering it on every class. So, `DayView` would reach `ListView` being filtered as it should be.

OH: “Microframework (n): A small amount of crap. See also Framework (n) : A large amount of crap.” — @nikita\_ppv

CONSULTER ?

# PYTHON 3 (COMPATIBILITÉ)

# PYTHON 3 WALL OF SHAME

Python 3.0 was released December 3, 2008.

As listed on PyPI - packages in **red** don't support python 3, packages in **green** do. Hopefully one day everything will be greener.

### What's included?

#### URL Routing

A simple tool for directing traffic based on

### Philosophy

No one agrees on frameworks. It's difficult to get consensus on how much or how little a framework should do. Flatiron's approach is to package simple to use yet full featured components and let developers subtract or add what they want.
